

Please Initial & Sign the Final Top View:

While it is our intention to install your playground in a safe and timely manner, our success relies on your preparedness. Site preparation and grading to be performed by others and prior to installation. Slope within the play area(s) shall not exceed 1% to ensure a successful installation and a compliant playground. Drain tile systems other than within 4' of the perimeter along drain aggregate base material may require installing after the installation of the play equipment and must be coordinated with installation of safety surface materials. Failure to prepare site(s) to these expectations may result in additional charges if installer is required to re-mobilize. Please contact MN WI Playground if you have any questions.

Maximum depth of safety surface and drain aggregate base should not exceed an 18" depth and shall not be installed until play equipment has been installed.
